CARBON BALANCING CAN HELP TO ALIGN YOUR ESG

The main benefit of an ESG certification, is the impact on your organisation's image and reputation and how it will make you stand out. Your clients, members and suppliers want to know that they are supporting ethical and sustainable organisations.

Romax, for example, is a carbon balanced supplier and supporter of the World Land Trust (WLT). We pay a carbon offset levy on behalf of all our clients' printed communications. As a Carbon Balanced Printer, we provide quarterly certificates to all our clients that reports the total CO2 that they have balanced over this period.

These certificates make a powerful addition to your ESG and CSR reporting and customer communications. London and Whipsnade Zoos, Marlowe Theatre, Emma Bridgewater and Shein, for example, have successfully balanced their carbon through their print jobs.

The truth is: the natural world is changing. And we are totally dependent on that world. It provides our food, water and air. It is the most precious thing we have and we need to defend it.
